The *Library Publishing Directory* provides an annual snapshot of the publishing activities of academic and research libraries, including information about the number and types of publications they produce, the services they offer authors, how they are staffed and funded, and their full involvement in documenting the breadth and depth of activities in this field. This resource aims to articulate the unique value of library publishing; establish a significant and growing community of practice; and to raise its visibility within a number of stakeholder communities, including administrative agencies, other scholarly publishers, librarians, and content creators.
