IFLA Committee on Standards
WLIC 2016, Greater Columbus Convention Center, Columbus, Ohio, USA

Meeting 1: Saturday 13 August 2016 (12:30 – 15:00) - Room C216
Meeting 2: Wednesday 17 August 2016 (08.00 – 09.30) - Room C216

Terms of reference: http://www.ifla.org/about-the-committee-on-standards
Current membership and composition: http://www.ifla.org/node/9429

Draft Minutes

Abbreviations used in these minutes
FRBR Functional Requirements for Bibliographic Records
GB (IFLA) Governing Board
ISBD International Standard Bibliographic Data
LIDATEC (IFLA) Linked Data Technical Sub-committee (sub-committee of the IFLA Committee on Standards)
RG Review Group (currently relates to FRBR RG and ISBD RG)
UNIMARC Universal MARC format
WLIC (IFLA) World Library and Information Congress

Members and sub-committee members in attendance:
Committee on Standards Chair: Jan Richards.
Committee on Standards Members: Abraham Azubuike (LIDATEC liaison and acting LIDATEC Chair); Diane Beattie; Christie Koontz; Miriam Säfström; Conference of Directors of National Libraries (CDNL) representative: Ulrike Junger; GB representative: Ágnes Hajdu Barát.
Committee on Standards non-voting members: FRBR: Chris Oliver; ISBD: Massimo Gentili-Tedeschi, Permanent UNIMARC Committee Vice-Chair: Jay Weitz.
IFLA Headquarters staff support: Professional Support Officer: Joanne Yeomans.
LIDATEC members: Gordon Dunsire.

Others also in attendance:
Meeting 1:
Frederick Zarndt (Chair, Division II; member of the IFLA Professional Committee), Christine Mackenzie (Treasurer, IFLA Governing Board), Julianne Beall, Gaëlle Béquet, Agnese Galeffi, René-Vincent du Grandlaunay, Lisa Hinchliffe, John Hostage, Irena Kavčič, Angela Kinney, Patrice Landry, Françoise Leresche, Dorothy McGarry, Susan Morris, Mélanie Roche, Sandy Roe.

Meeting 2:
Apologies: Paola Manoni (also ISO TC 46 representative); Dianne Oberg; LIDATEC Chair: Lars Svensson

Meeting 1

1 Welcome
The Chair welcomed everyone to the meeting and asked Committee on Standards members to identify themselves so that it was clear to everyone who were Committee members and who were observers.

2 Apologies
Apologies were received as above.

3 Approval of the agenda
The agenda was approved. At meeting 2, the Committee also received a short report from LIDATEC (item 8.4).

4 Approval of the minutes of the meeting held in Cape Town
Chris Oliver asked for some corrections to be made to the FRBR report (item 3.1). With these corrections, the minutes were approved and will be posted online: http://www.ifla.org/standards-committee/meetings

5 Business Arising from the minutes of the previous meeting
There was no business arising.

6 Announcements and report from the Professional Committee
A project to redesign the IFLA web site has begun with a survey of IFLA’s professional community. This indicates that, among other things, that group believes that standards do not have high enough prominence on the current site. It is important that the Committee on Standards feeds into the project its opinion on how to do this. The point had already been recognized in the ninth recommendation of its own recent report “Review of the management and representation of IFLA permanent standards review groups” that: “standards should be prominently presented on the IFLA website”.

The new Secretary General made a presentation to the Professional Unit Officers at the start of the WLIC 2016 explaining that he wants the Professional Units to have a central position in defining a vision for IFLA’s future and that IFLA Standards will be included in that discussion. Representatives from the Units will be invited to a vision meeting in the first quarter of 2017 and the Professional Support Officer will ask if it is possible to include representatives from the Standards Review Groups.
Professional Units have been invited to discuss ‘what makes a dynamic IFLA Professional Unit’. The results of this discussion will be shared after the WLIC and might be useful for the Committee on Standards to also reflect upon.

7 WLIC Programme Columbus
The Committee on Standards’ open programme at the WLIC 2016 in Columbus, Session 144 IFLA Standards - making a difference? will take place on Tuesday 16 August, 13:45 – 15:45 in Hall E. Simultaneous Interpretation will take place and five very interesting papers have been selected by the Committee.

Elsewhere in the programme, there are a number of sessions discussing endorsed IFLA guidelines or guidelines still in progress, for example, the guidelines on Library Services for Children and Young adults, on People Experiencing Homelessness, and on Continuing Professional Development. The Committee on Standards had returned reviews on all of these guidelines in recent months. The Committee Chair asked Committee members to attend these sessions if possible in order to keep a link with them. The Professional Support Officer passed on thanks to the Committee members from the Units responsible for these guidelines for their quick review responses which have enabled the Units to prepare and hold discussions on these guidelines during the WLIC.

8 Reports:
8.1 UNIMARC – Jay Weitz (Vice-Chair of the Permanent UNIMARC Committee)
This report took place during meeting 2, see below.

8.2 ISBD – Massimo Gentili-Tedeschi (Chair of the ISBD RG)
The ISBD development has been put on hold pending the discussions of the Cataloguing Section’s Standing Committee on the strategy for its development: whether to continue developing the content of ISBD on the current level, or plan for a shorter and more principle-based ISBD. Both scenarios would involve changing ISBD to reflect the new FRBR model, thus before starting the revision process it is necessary to wait for the completion of the FRBR-Library Reference Model (LRM).

During 2016 the ISBD RG received PC Funds to complete the work on maps and alignments and guidelines for the use of ISBD as linked open data, and prepare the publication of all the work on the IFLA website. They met in Paris on 30-31 May where they finalised the guidelines and the alignment with the older version of FRBR which gives all the elements needed for the next step to align with the new model, using the mapping from FRBR version 1 to version 2. They have worked on the unconstrained ISBD namespace which means that every single element of ISBD is available to be used, even by non-library communities, and separate from the vocabularies.
In accordance with the protocol established in November 2011, the RDA Steering Committee (RSC) invited Massimo Gentili-Tedeschi to their meeting in Frankfurt, November 2016. ISBD is one syntax for exposing RDA data, and RDA publishes alignments and maps to and from ISBD elements, while IFLA does not make such documents available on its website.

Polish, Serbian and Slovenian translations of the ISBD Consolidated edition are in preparation, which will bring the number of languages in which the ISBD is available to thirteen.

The RG has a number of questions to consider for its coming work, the alignment with FRBR, and what the FRBRised text will look like, whichever scenario is chosen. These questions throw up further questions about the role ISBD plays as a central reference point in relation to national rules. Massimo Gentili-Tedeschi urged the Committee on Standards to continue supporting ISBD as an IFLA Standard.

Miriam Säfström reported that there is a concern in the Cataloguing Section Standing Committee that the different groups within IFLA are duplicating some work. Also, that the reliance by IFLA on volunteer work, which provides the benefit of a producing a product that can be offered for free, may also prove detrimental to IFLA’s ability to maintain a solid base for all its standards. Therefore, they have suggested different options for the development of ISBD which might be investigated. They would like the ISBD RG to explore these alternatives so that the Committee on Standards can decide how to further international standards.

8.3 FRBR – Chris Oliver (Chair of the FRBR RG)
The FRBR RG spent a full day at the end of WLIC 2015 working on the draft of the FRBR-Library Reference Model (LRM), a consolidation of the FRBR, FRAD (Functional Requirements for Authority Data) and FRSAD (Functional Requirements for Subject Authority Data) conceptual models. After further work in the fall of 2015 by the Consolidation Editorial Group (CEG), a subgroup of the RG, the draft was ready to be sent out for worldwide review which occurred during March and April 2016. One hundred and sixty-three pages of comments were received. The CEG met in Paris for almost five days in May to analyse the comments. These range from editorial comments and comments on the examples chosen to questions arising from misunderstanding certain points in the model. But no major changes are suggested to the fundamental structure of the model. The CEG has prepared a new draft where they have added explanatory text to the model definition and made some adjustments to the modelling in response to the comments.

The CEG will present the new version of the draft to the RG at the meeting on Thursday 18 August after which the RG will meet on Friday 19 August to discuss further. Already RDA documents refer to the draft shared in 2015 so it’s important that the RG presses forward to complete the final revision. Following these meetings, an updated draft will be submitted to the
three IFLA Sections for Cataloguing, Bibliography, and Classification and Indexing, then on to
the Committee on Standards for approval so that ideally it is ready to promote and discuss at
WLIC 2017.

FRBRoo version 2 was sent for approval to the Committee on Standards. It was approved in
principle with minor revisions requested. The RG will discuss a change of title and promotion of
the FRBR-LRM during their meetings in Columbus.

An updated Spanish translation of FRBR has been produced which includes the 2007/2009
changes and an alignment of vocabulary with the Spanish translation of the International
Cataloguing Principles.

of FRBR RG activities during the past year.

9 Report on – Review of the Management and Representation of IFLA Permanent
Standards Groups (attached)
The Committee on Standards Chair thanked Patrice Landry for all his work on this report.

Patrice Landry reminded everyone that the Committee on Standards had mandated him to
draft this report and submit it to the Committee on Standards, then to the Professional
Committee. The mandate was to look at the sustainability and review process for the RGs in the
context of the current IFLA standards environment. The Professional Committee has
responsibility for IFLA professional groups on behalf of the Governing Board.

It’s logical that the management and governance procedures of these long-standing
committees are aligned with each other and clarified, and that there is enough information
available to make their work and their procedures open and understandable for IFLA Members.
Since the establishment of the Committee on Standards, it is important to reflect this new
coordinating body in the procedures.

UNIMARC has a different set-up to the other RGs and is defined as a Core Activity. As the
current hosting library had indicated it can no longer take on this role, there are a separate set
of recommendations specifically for UNIMARC.

After full consultation with all the parties involved, the report was submitted to the
Professional Committee and Governing Board in March 2016. All the recommendations were
approved and the Committee on Standards was therefore asked to produce an implementation
plan for how the recommendations would be communicated or carried out, submit this to the
Professional Committee for comments, and report regularly as the implementation is carried
out from 2017.

The report will be shared with the Committee on Standards and RGs. The implementation plan
will be discussed as part of the Action Plan for 2016 – 2017 (item 11 in meeting 2 below).

The IFLA Strategic plan had a focus on standards on which to base the work of the Committee on Standards, and also gave the right for the Committee to say to the IFLA Professional Units that standards work is important.

The Committee has made progress according to the Action Plan, but is not as far as it had expected to be. Due to the geographical spread of members it is difficult to find a time when a conference call would work, so communication holds some things back. New communication software expected to be introduced for the support of the Professional Units by December, might help.

The Committee would also like to develop a ‘contract’ for new incoming committee members so that expectations were clear. This might be sent out as part of the nomination call. Current members would like to be allocated clearer tasks that they could work on individually or in small teams to report back to the Committee centrally.

From the Action Plan:

Activity 1: Support IFLA and the wider library and information community through processes that facilitate current, relevant and accessible standards and guidelines.

- Review and strengthen the procedures for writing and updating IFLA standards and guidelines.

This activity was delayed due to other commitments but the Chair wants to get this back on track to complete by August 2017.

Feedback on this action from the meeting:

- The focus of the manual is on new standards and could be clearer on how to handle revisions.
- It could be clearer how to handle standards that are partly developed outside IFLA.
- It could be more explicit for the RGs of the long-standing IFLA standards that go through many revisions and updates.
- Cataloguing Section can pass on feedback from their experience of using it recently.

- Develop a process that ensures the currency and relevance of IFLA standards and guidelines.
- Analyze data on the use of IFLA standards.

Christie Koontz had performed an audit of the list of standards on which there are still some that are older than ten years and have not been revised or approved as still valid. The Committee on Standards Chair has written to all Professional Unit Chairs to ask them to look at their own publications and comment if they are still current and valid, needed, being revised,
and if so, expected date of completion. After the WLIC she will follow up on this to compile the responses for the next steps.

- Make IFLA standards and guidelines available through the IFLA Library.

This activity had been regarded as lower priority, though it is potentially quick to achieve. The advantages of adding them to the IFLA Library are improved indexing, search facilities, archiving and document management. This, in turn, should make them more visible and more used across the world. They can still be collected on a web page list as they are now and there are still questions to answer about how to give them more visibility on IFLA web pages. It would also be possible to add complementary documents so that these are also retrievable, such as case studies, guidance on how to use the standards, etc. The Committee on Standards wants to raise the priority of this activity to complete it before August 2017.

- Provide support for professional units during the development and validation of standards.

This is ongoing work which has been completed as and when needed during the year.

- Investigate status of MulDiCat which might serve as a translation tool for IFLA standards.

This responsibility has been passed to LIDATEC.

**Activity 2: Increase the profile of IFLA standards and guidelines through communication and engagement.**

- Ensure the delivery of strong and relevant conference programs (at WLIC 2016).

Completed.

- Liaise with other standards organisations.

Reports from liaison representatives have been submitted. ISSN would be interested to have a liaison relationship with the Committee and will look out for the call for nominations, which is sent widely through IFLA’s networks.

- Improve the visibility of standards working groups within IFLA so that decision making is improved.

This is part of the **Review of the Management and Representation of IFLA Permanent Standards Groups** (item 9 above).

During WLIC, the meetings of the RGs are not publicised and are therefore not open. There is no reason for this, so the Committee can check this in writing with all RGs, and formulate a proposal to the Professional Committee to change this in future.

- Develop a Marketing Strategy for the promotion and communication of standards.
Work on this activity has not been started so should be moved to next year. The Committee might also investigate whether IFLA can produce a general social media strategy to which the committee’s work might be aligned. Standards are currently promoted by the individual Unit that produces them, and news items, if produced, can be pushed to the IFLA front page. The Unit responsible is encouraged to use the WLIC programme to promote and discuss new standards.

These discussions will be taken into consideration when preparing the new Action Plan (see item 11, meeting 2 below).

11 Development of Action Plan 2016-2017
This discussion took place during meeting 2, see below.

12 Implementation Plan for Standards Review Group Report (see item 9 above)
This discussion took place during meeting 2, see below.

13 Any other business (meeting 1)
13.1 Standards review procedure and timings
Agnese Galeffi was responsible for submitting the ICP for approval. She suggested it would be useful for the Committee on Standards to make people more aware of what they are doing when reviewing a standard, and perhaps have a calendar to track the process of a submitted standard. This could also be useful for the Committee to monitor work in progress. The idea will be fed into the manual revision working group.

13.2 Information dissemination for the Committee
Abraham Azubuike asked if the Committee could appoint an Information Coordinator. The IFLA Headquarters Professional Support Officer currently updates the webpages but it was suggested someone on the committee could take on a stronger advocacy role, post regular news from the group and provide more information. The Chair will investigate the technicalities concerning access and report back to the Committee. The Committee also needs to rely on the Professional Units to help promote information.

13.3 Law Libraries guideline
Patrice Landry reported that he and Frederick Zarndt had spoken at WLIC 2015 to the Law Libraries Section about production of a new guideline concerning access to legal documents in each country. Following further discussion, this now looks like it will become an IFLA manifesto which will therefore be approved by the Governing Board and will not come to the Committee on Standards. Stuart Hamilton, IFLA Director of Policy and Advocacy is involved in carrying it forward.

13.4 MulDiCat (Multilingual Dictionary of Cataloguing Terms and Concepts)
The issue of ownership was raised last year and is not yet resolved so may still need adding to the Action Plan. LIDATEC will meet on Thursday at 11am and will have this on the agenda. [See resolution of ownership discussed in meeting 2, item 11 below]
14 Next Meeting
The second meeting of the Committee on Standards will take place on Wednesday 17 August 2016 (08.00 – 09.30) - Room C216 of the Greater Columbus Convention Center.

15 Close
The Chair closed the meeting.

Meeting 2

8 Reports:
8.1 UNIMARC – Jay Weitz
Current editions of UNIMARC Bibliographic (U/B) and UNIMARC Authorities (U/A) are the 2008 and 2009 publications respectively. The U/B Update covering 2008-2012 is available on the UNIMARC Web site at http://www.ifla.org/publications/unimarc-bibliographic-3rd-edition-updates-2012?og=33 and the U/A Update covering 2009-2012 is at http://www.ifla.org/publications/unimarc-authorities-3rd-edition-updates-2012. The Permanent UNIMARC Committee are in the process of putting together the updates covering 2013 – 2016, which includes the results of thirty different proposals, twenty-two of which were approved, and eight rejected. A lot of the updates are concerned with aligning with RDA. Once the compilation is completed they will be put online.

A more detailed report for the previous year can be found online: http://www.ifla.org/files/assets/uca/puc-meetings/26th_puc_meeting_2016.pdf

8.4 LIDATEC – Abraham Azubuike
Abraham Azubuike has been appointed by the Committee on Standards as acting Chair during the absence due to ill health of the LIDATEC Chair between late March and September 2016. The Committee on Standards Chair thanked him for taking this on.

As a result, the Committee agreed to place some of the items on LIDATEC’s agenda on hold during this period, but the following were completed:

- A change to the IFLA namespaces CC licence (from CC BY NC SA to CC BY) was recommended to and approved by the Governing Board.
- A discussion was concluded to approve the change of name of the Semantic Web Special Interest Group (SIG) to the Linked Data SIG. The SIG has been asked to work with the LIDATEC sub-committee so that the work of both groups is enhanced and aligned.

LIDATEC is reviewing options for publishing IFLA namespaces and vocabularies, which necessarily touch on the funding. This will be discussed further at the LIDATEC meeting which takes place after the Committee on Standards meeting and will form the main point of the Action Plan for the coming year.

11 Development of Action Plan 2016-2017
The following were agreed upon as Actions for the Committee in 2016 – 2017 (numbered for convenience not to indicate priority):

1. **IFLA Standards Manual review**: Lisa Hinchcliffe and Ágnes Hajdu Barát will join the working group revising the Standards Manual. The group will report to the Committee in December with a final report expected August 2017. It would be useful if the manual included some indication of what constituted a new edition, and the level of changes required to seek approval.

2. **Currency and relevance of IFLA standards**: The audit has been completed and the Committee on Standards Chair has feedback from the Units on what they plan to do. Christie Koontz will continue to be involved in developing this action.

3. **Analyze use data**: The Committee on Standards Chair will follow up with a potential volunteer: Dr Kate Davis (Queensland University of Technology). The data could be made into a visual presentation, and used to provide data on individual standards which the authoring Section might find useful. Future use of these statistics is unclear until the current data is presented and discussed.

4. **Addition of IFLA standards to the IFLA Library**: the work to create an upload template is holding this back, the whole job is relatively small but has had low priority. Lisa Hinchcliffe volunteered to ask one of her students to look at the metadata requirements for uploading IFLA Standards to the IFLA Library. Joanne Yeomans will send her the documents necessary (list of standards, and Eprints metadata overview) and arrange access to the repository if and when necessary. Miriam Säfström will put her in touch with someone from the Cataloguing Section to review the proposal.

5. **MulDiCat**: this was referred to LIDATEC as there was the belief it still needed to be published as linked data, however, Gordon Dunsire confirmed that this was completed in 2012. The namespaces page is pointing to the wrong location, however, and needs correcting. The Cataloguing Section has discussed it further and proposes to take back responsibility as there are currently only cataloguing terms used in the dictionary. They will discuss it further with the Bibliography and the Classification and Indexing Sections, and report back to the Committee on Standards.

6. **WLIC programme 2017**: the Committee agreed it should aim to have a programme every year to highlight the diversity within IFLA as well as to present work by the Committee on Standards, for example, presenting the manual and its revisions. The Committee on Standards Chair joined a table at the Officers Capacity Building session to discuss the revision or writing of standards, and this was very useful, so participation in Officers sessions like this should also be repeated in future. The Committee on Standards might also do more to promote to delegates the sessions of Units that are promoting their own standards.

7. **Marketing strategy**: the same working group as in 2016 will continue on this.

8. **Visibility of standards RGs**: recommendations concerning this are contained in the “Review of the Management and Representation of IFLA Permanent Standards Groups” so will be taken care of as part of the implementation plan. Diane Beattie, Mariam Säfström, and Joanne Yeomans will develop a draft implementation plan for mid-November detailing actions for each recommendation.
responsibility and time-line. The Committee on Standards and Professional Committee can then identify priorities in December.
The final Review document will be shared with the RGs at the start of this work.

Additional actions:
9. **Call for nominations and handover to new Committee in August 2017**: from item 10 above: “The Committee would also like to develop a ‘contract’ for new incoming committee members so that expectations were clear. This might be sent out as part of the nomination call.” The call for nominations will go out in November 2016 with a deadline at the end of February 2017.

13  **Any other business (meeting 2)**

13.1  **ISBD**

Following the discussion in meeting 1 under item 8.2, there had been progress during the WLIC Cataloguing Section Standing Committee meeting in discussing a roadmap for the future direction of ISBD development. All agreed that revision would be recommended and the ISBD RG were keen to know when this could start. The FRBR RG is keen for the ISBD to look at alignment and would like to see it happen to demonstrate to the rest of the world how this alignment can be done. FRBR RG would therefore like to work together with ISBD RG on this, and the Cataloguing Section is also keen to feed its views into this. This would mean the ISBD RG could be working on something whilst the strategic planning takes place. All agreed this should move forward.

Massimo Gentili-Tedeschi will resubmit the “Guidelines for translations of the IFLA ISBD namespace in RDF” as there had been no response yet from the Committee.

14  **Next Meeting**

The next meeting of the Committee on Standards will take place during the WLIC 2017 in Wrocław, Poland. The dates of the WLIC 2017 are 19 – 25 August 2017 but specific dates for the Committee meetings are not yet known.

15  **Close**

The Chair thanked everyone for their work and support and wished everyone an un-delayed, safe journey home.
Notes of International ISBN Agency Board Meeting

Arjuna Room, Discovery Kartika Plaza Hotel, Jl. Kartika Plaza,
South Kuta 80361 Bali, Indonesia
Sunday 20 September 2015

Present:
Ronald Schild (Chair), Piero Attanasio*, Beat Barblan, Maarit Huttunen*, Miguel Jiménez,
Alenka Kanič, Jonathan Nowell*, Carol Riccalton*, Stella Griffiths, Nick Woods

* participated via Skype connection.

Apologies:
Henri Barthel, Bernardo Jaramillo Hoyos, Neil Wilson

1. ISMN
Ronald confirmed to the Board that Hartmut Walravens of the International ISMN Agency wished to pursue closer collaboration with ISBN. Ronald, Beat and Stella have arranged to meet Hartmut to identify possible ISMN requirements.

2. Revision of ISBN Standard
The next step is for the Draft International Standard (DIS) to go out for ballot by the end of November 2015. Stella expects that the revised version of the draft should be ready in time for that as there would be a working group meeting on 23 October where final changes would be agreed.

Note: the text was finalised and released to ISO in early November on schedule and is awaiting the ballot to be issued by ISO.

3. Standard Numbering – 50th anniversary
Stella spoke about the reception being held at Frankfurt Book Fair to celebrate the fiftieth anniversary of standard book numbering. This will be held on the eve of the Fair, immediately after EDItEUR’s Supply Chain Seminar. An ISBN timeline and map of the spread of ISBN are in preparation. It was not now proposed to continue with a promotional video.

4. Date of Future Meetings
The next meeting is scheduled to be held on Thursday 14 April 2016, during London Book Fair. The room is to be confirmed.

Stella confirmed that for 2016 the Board has already accepted an offer from the Austrian ISBN Agency to host the AGM in Vienna. The agency is in the process of selecting the venue.
Notes of International ISBN Agency Board Meeting
Dark Room, London Book Fair, Olympia, Hammersmith Road, London, U.K.

Thursday 14 April 2016

Present:
Ronald Schild (Chairman)
Piero Attanasio
Beat Barblan
Miguel Jiménez
Alenka Kanič
Carol Riccalton
Neil Wilson
Jon Windus
Stella Griffiths
Nick Woods

Apologies:
Henri Barthel
José Borghino
Maarit Huttunen
Bernardo Jaramillo Hoyos
Sophie Saint-Marc

The Chairman, Ronald Schild opened the meeting and welcomed the participants, particularly Jon Windus who was attending the ISBN Board meeting for the first time. Before the meeting began, the Board observed a minute’s silence for Dr. Norman Paskin of the International DOI Foundation who had helped to develop ISBN-A and had passed away recently.

1. Composition of the Board
Ronald advised the Board members present that Jens Bammel and Jonathan Nowell had each left their positions and resigned from the IIA Board. It had been proposed that the Board co-opt José Borghino to represent the International Publishers’ Association and that Jon Windus from Nielsen be asked to complete the remainder of Jonathan’s term. The Board members present agreed.

2. ISBN Resale
There are two issues concerning the reselling of ISBNS.

a) GS1 noticed supposedly “unused” GTINs being offered for sale on eBay – a particular individual was searching online to see if a specific string of numbers is already in use and, if not, attempting to sell the GTIN. GS1 advised us because, in some cases, the numbers were from ISBN ranges.

b) The ISBN Agency has recently written to the owner of the website isbnagency.com which claims to be “the most trusted source for ISBNS”. When anyone buying these ISBNS logs on to Bowker systems to update the metadata of their publications, they can’t do so because they don’t own the data – isbnagency.com does. Such practices are regarded as being very misleading. Beat advised that Bowker are trying to enforce a rule that, at the very least, anyone selling on ISBNS has to state explicitly the consequences for publishers. Also, Beat reported that the US online application system permits publishers to apply for a maximum of 100 ISBNs at a time.

Action: IIA to continue to pursue isbnagency.com

The Draft International Standard (DIS) was issued for a 3-month ballot that started in February. It is hoped that the results will be good enough to avoid Final Draft International Standard stage. The Working Group is aiming for publication of the revised standard by about the end of 2016.

A new version of the Users’ Manual will follow shortly after the Standard is published. The Working Group hope to produce a marked-up version to show the changes compared with the
current edition. The main areas of change are a new section on self-publishing and more detail on the assignment of ISBN to digital publications.

IIA will plan to issue a mailing and to release information on its website and in its newsletter. Contacting the press and/or issuing a specific press release were endorsed by the Board members present. National agencies can also mention the news on their own websites too.

4. Data Licensing
The Global Register of Publishers (GRP) is freely available and, by registering, users can obtain more detailed contact information about the publishers. If a user of the GRP initiates a search, the results are deliberately limited to display only the first 150. This offers some protection against anyone attempting to scrape the data.

Some companies had expressed an interest to the IIA in being able to view a wider range of results and/or to have the full dataset. With that in mind, the Board members present were asked for their views on the IIA exploring options to license the whole GRP dataset to certain users. Any licensing agreements would have to be specific and the data would be flagged to ensure it is attributed to the IIA. The Board members present agreed that, in principle, if there is nothing objectionable about the request, they would be in favour of licensing the GRP data.

5. Any Other Business
There was no other business.

6. Dates of Future Board Meetings
The next Board Meeting and AGM will be held in September in Vienna, Austria. In 2017, The Board members present agreed to hold the Spring 2017 Board meeting at London Book Fair on 16 March 2017.
ISO/TC46 (Information and Documentation) liaison to IFLA

Annual Report

2016

TC46 on Information and documentation has been leading efforts related to information management since 1947. Standards\(^1\) developed under ISO/TC46 facilitate access to knowledge and information and standardize automated tools, computer systems, and services relating to its major stakeholders of: libraries, publishing, documentation and information centres, archives, records management, museums, indexing and abstracting services, and information technology suppliers to these communities. TC46 has a unique role among ISO information-related committees in that it focuses on the whole lifecycle of information from its creation and identification, through delivery, management, measurement, and archiving, to final disposition.

***

The following report summarizes activities of TC46, SC4, SC8 SC9\(^2\) and their resolutions of the annual meetings\(^3\), in light of the key-concepts of interest to the IFLA community\(^4\).

1. SC4 Technical interoperability

1.1 Activities

Standardization of protocols, schemas, etc. and related models and metadata for processes used by information organizations and content providers, including libraries, archives, museums, publishers, and other content producers.

1.2 Active Working Group

WG 11 – RFID in libraries
WG 12 – WARC
WG 14 – Interlibrary Loan Transactions
WG 15 - Metadata and protocols for long-term preservation

\(^1\) For the complete list of published standards, cfr. Appendix A.

\(^2\) ISO TC46 Subcommittees: TC46/SC4 Technical interoperability; TC46/SC8 Quality - Statistics and performance evaluation; TC46/SC9 Identification and description; TC46/SC 10 Requirements for document storage and conditions for preservation; TC46/SC11 Archives/records management - Cfr Appendix B.

\(^3\) The 43\(^{rd}\) ISO TC46 plenary, subcommittee and working groups meetings, Wellington, New Zealand, May 9-13 2016.

1.3 Joint working groups
EPUB (Joint JTC 1/SC 34-TC46/SC4-IEC/TC 100/TA 10)

Revision of ISO 639 (Joint ISO/TC 37/SC 2 - ISO/TC46/SC4)

1.4 Standards completed since Last Meeting (Beijing, June 2015) and new publications

- ISO 10160:2015 (Open Systems Interconnection -- Interlibrary Loan Application Service Definition)
  This international standard defines the services for Interlibrary Loan. These services are provided by the use of the ILL protocol in conjunction with the supporting telecommunications service which might be a store-and-forward messaging service. ISO 10160:2015 is intended for use by libraries, information utilities such as union catalogue centres, and any other system which processes bibliographic information. These systems might participate in an interlibrary loan transaction in the role of requester (i.e. an initiator of ILL requests), responder (i.e. a provider of bibliographic material or information) and/or intermediary (i.e. an agent that acts on behalf of a requester to find suitable responders).

1.5 News about standards and activities

Projects underway

Revision of ISO 28500 (WARC): Only minor changes are needed
The WARC (Web ARChive) file format offers a convention for concatenating multiple resource records (data objects), each consisting of a set of simple text headers and an arbitrary data block into one long file.

ISO/CD 20614 Data Exchange Protocol for Interoperability and Preservation (DEPIP)
This international standard facilitates information transfer between digital asset management systems and digital archives. It is based on French national standard MEDONA, published in 2014. The CD was approved and the DIS vote will be in Autumn 2016.

Fast track standardization of OASIS SRU (Search and retrieve via URLs) standard; successor of ISO 23950 (Z39.50).
OASIS has been a Category A liaison of TC 46/SC 4 since 2014.

Revision of the Dublin Core standard, in close cooperation with Dublin Core Metadata Initiative
ISO 15836:2009 (The Dublin Core metadata element set) covers only the so called 15 core elements of the metadata format. These core elements are also known as properties in the /elements/1.1/ namespace, and they represent only a small subset of the specification, which consists of, among other things, 40 additional
properties and 22 classes. Although ISO 15836:2009 has served the users well, it is necessary to check and, if necessary, revise definitions of the terms, because some of them are outdated. More importantly, it is necessary to extend the ISO standard so that it covers all relevant properties and classes from the Dublin Core specification. Dublin Core metadata initiative and ISO TC 46/SC 4 established an informal working group with the task of revising the ISO standard. The group has now completed its work by releasing two documents.

Final Draft International Standard ISO/FDIS 15836-1 is a revised version of the existing standard. Compared with its predecessor, the revision contains updated term definitions and some editorial changes required by ISO.

It still contains the 15 core elements and their names have not changed. Since the changes to the existing standard can be regarded as minor, the revised document can be passed directly to the FDIS vote, which will be the first and only vote in the process. Once ISO/FDIS15836-1 has been approved, DCMI intends to update the Web version of the Dublin Core specification so that the two versions are aligned.

ISO/NWIP 15836-2 is a New Work Item Proposal, which contains the 40 properties and 22 classes missing from Part 1 of the standard.

As in Part 1, definitions have been updated. Since the changes to the existing standard can be regarded as minor, the secretariat recommends that the revised document is approved as Draft International Standard (DIS).

Once ISO 15836-2 has been approved, DCMI intends to update the Web version of the Dublin Core specification so that the two versions are aligned.

Long term preservation of EPUB3 documents: JWG is working on three documents:

- Principles
- Metadata specification
- Schema

1.6 Relevant resolutions 2016 (SC4 Plenary meeting - Wellington, New Zealand, May 11, 2016)

This international standard specifies a data model and encoding rules for the use of radio frequency identification (RFID) tags for items appropriate for the needs of all types of libraries.
Minor revision of ISO 18626 (Interlibrary Loan Transactions)
This International Standard specifies the transactions between libraries or libraries
and other agencies to handle requests for library items and the following exchange
of messages.

Minor revision of ISO 15836:2009
SC4 requests ISO 15836 to become ISO 15836-1 Information and documentation -
The Dublin Core metadata element set – Part 1: Core elements;
Upon approval from DCMI, SC 4 will launch a NWIP on ISO/DIS 15836-2 Information
and documentation - The Dublin Core metadata element set – Part 2: DCMI
Properties and classes.
2. SC8 Quality – Statistics and performance evaluation

2.1 Activities
Standardization of quantitative and qualitative data for the management of information organizations and content providers, e.g., libraries, archives, museums and publishers.

2.2 Active Working Groups
- WG 2 - International library statistics
- WG 4 - Performance indicators for libraries
- WG 7 – Quality measures for national libraries
- WG 8 – Statistical data for library buildings
- WG 9 – Statistics and quality issues for web archiving
- WG 10 – Methods and procedures for assessing the impact of libraries
- WG 11 – International museum statistics
- WG 12 – International archive statistics

2.3 Standards completed since Last Meeting (Beijing, June 2015) and new publications
- ISO 18461:2016 International museum statistics
  This international standard specifies rules for the museum community on the collection and reporting of statistics. It provides definitions and counting procedures for all types of resources and services that museums offer to their users.

2.4 News about standards and activities

WG2 - Library statistics
WG 2 met in Vienna on October 15, 2015 to discuss new developments for a next revision of ISO 2789 (International library statistics). This international standard specifies rules for the library and information services community on the collection and reporting of statistics:

WG 4 - Performance indicators for libraries
WG 4 met in Vienna on October 14, 2015 to discuss new developments for a next revision of ISO 11620 (Library performance indicators).

WG 7 – Quality measures for national libraries
ISO/NP 21248 (Quality assessment for national libraries) was initiated on February, 2016 with the extended track standardization (48 months).

WG 10 - Methods and procedures for assessing the impact of libraries
WG 10 met in Vienna on October 2015, to discuss new developments for a next revision of ISO 16439 (Methods and procedures for assessing the impact of libraries).

WG 11 – International museum statistics
ISO 18461 (International museum statistics) was published on March 2016.
ISO/NP 21246 (Key indicators for museums) was initiated on February 2016 with the extended track standardization (48 months).

**WG 12 – International archives statistics**
WG 12 met in Vienna on October 13 to 16, 2015 to develop the committee draft of ISO 19580 (International archives statistics).

### 2.5 Relevant resolutions 2016 (SC8 Plenary meeting - Wellington, New Zealand, May 12, 2016)

**Revision of ISO 2789** (International Library Statistics): SC 8 requests experts of WG 2 to collect contributions for the revision of this international standard.

**Revision of ISO 11620** (Library Performance Indicators)
SC 8 requests experts of WG 4 to collect contributions for the revision of this international standard.

**New standard ISO/NP 21248** (Quality assessment for national libraries)
SC 8 requests experts of WG 7 to meet on 20 and 21 June 2016 in Frankfurt am Main Germany to begin work on the new standard.

**Revision of ISO 16439** (Methods and procedures for assessing the impact of libraries)
SC 8 requests experts of WG 10 to collect contributions for the revision of this international standard.

**New standard ISO/NP 21246** (Key indicators for museums)
SC 8 requests experts of WG 11 to meet later in 2016 to work on the new standard.

**Committee draft of ISO19580** (International archives statistics)
SC 8 requests WG12 to prepare a full committee draft at a meeting later in 2016.
3. SC9 Identification and Description

3.1 Activities
Standardization of information identifiers, description and associated metadata and models for use in information organizations (including libraries, museums and archives) and the content industries (including publishing and other content producers and providers).

3.2 Active Working Group
WG 2 - International standard work code (ISWC)
WG 4 - International Standard Book Number (ISBN)
WG 10 - International Standard Recording Code (ISRC)
WG12 - Indexes and indexing
WG13 - International library item identifier (ILII)
Ad hoc Identifiers Interoperability Group
Ad hoc Registration Authorities

3.3 New Work Items
None.

3.4 Standards completed since Last Meeting (Beijing, June 2015) and new publications

---

5 The ISSN International Centre is the Registration Authority for ISO 3297. ISO 3297 was first published in 1975 and last revised in 2007. In 2010-2011, the standard came under systematic revision and was confirmed. On April 2016, a five-month ballot on systematic revision was launched.

The ISSN International Centre is asking for a revision/amend in the Systematic Review ballot.

The ISSN International Centre considers that a revision of ISO 3297 is now justified for the reasons detailed below:

- **Defining what “editions” represent in the digital world:** The ISSN standard states that “different ISSN and key titles shall be assigned to the different editions”. It may be useful to define further what to consider a “different edition” in the context of digital publishing.

- **Revising the list of mandatory and facultative ISSN metadata:** Consistency should be ensured with other bibliographic standards.

- **Granularity of ISSN assignment:** An ISSN currently identifies a unique title on a specific medium, while the ISSN-L identifies a unique title whatever the medium may be. The creation of a “meta-ISSN” identifying a same title through history and whatever the title changes may be or the possibility to use the ISSN in the identification of subparts of a serial, e.g. issues, could be further investigated.

- **Use of ISSN and ISSN-L with other identification and linking systems:** The relationships between ISSN and other identifiers or the use of ISSN in the linked data environment may come under consideration.
3.5 News about standards and activities

WG 2 - International standard work code (ISWC)
Following the systematic review and a draft new work item proposal a resolution was made to revise this standard: ISO/NP 15707 (ISWC)
The working group has been unable to begin its work because an insufficient number of member bodies have registered experts for the group to begin its work.

WG 4 - International Standard Book Number (ISBN)
Following the approval of the CD ballot, WG 4 responded to the submitted comments and provided a revised draft for DIS ballot. That ballot was issued on February 2016 and the ballot closed on May 2016.

WG 10 - International Standard Recording Code (ISRC)
WG10 settled a significant remaining issue and submitted a draft for circulation as a DIS. There were some editorial errors that were a result of the Secretariat’s review, which required a revision of the DIS be recirculated.

WG 11 - International standard link identifier (ISLI)
ISO International standard link identifier (ISLI) was published on May 15, 2015 and WG 11 was disbanded. The ICIA, the Registration Authority for ISLI, was approved as a Category-A Liaison by ballot.

WG12 - Indexes and indexing
A report of the recommendation of WG12 regarding the gap analysis between ISO 999 (Guidelines for the content, organization and presentation of indexes) and ISO 5963 (Methods for examining documents, determining their subjects, and selecting indexing terms) was circulated for consideration during the SC9 Plenary meeting in Wellington, New Zealand. (May 11, 2016).

WG13 - International library item identifier (ILII)
WG 13 moved quickly to produce a committee draft, which was submitted to the SC9 Secretariat and has been held for editorial review. That CD ballot circulated in early May 2016.
3.6 Relevant resolutions 2016 (SC9 Plenary meeting - Wellington, New Zealand, May 12, 2016)

**Minor Revision of ISO 3297** (International standard serial number - ISSN) [see note, p. 7] SC 9 acknowledges the results of the vote on the minor editorial revision of ISO 3297 and requests ISO CS to proceed with publishing the minor revision of the standard.

**International Library Item Identifier**
SC 9, having received a draft from WG 13, instructs its Secretariat to prepare for distribution a CD Ballot of the draft before May 30, 2016.

**Revision of ISO 999** (Guidelines for the content, organization and presentation of indexes) SC9 resolves to launch a revision process of ISO 999 and instructs WG12 to begin a revision of ISO 999 to include the useful precepts from ISO 5963 (Methods for examining documents, determining their subjects, and selecting indexing terms) on subject indexing, with a target publication date of August 31st 2019.

**ISO 690** (Guidelines for bibliographic references and citations to information resources) SC 9 requests that a member body prepare a proposal to revise ISO 690, in particular to address electronic resources in the standard.

### 4. Working Groups under the responsibility of TC46

#### 4.1 Active Working Groups

- WG 2 - Coding of country names and related entities
- WG 3 - Conversion of written languages
- WG 4 - Terminology of information and documentation
- WG 4 - Presentation of periodicals

#### 4.2 Standards completed since Last Meeting (Beijing, June 2015) and new publications

#### 4.3 News about standards

**ISO 8 - Presentation of periodicals**

**Background:**
Last year TC46 resolved to submit the NWIP sent by ANSI/NISO following Resolution 2014-09 in order to revise the scope of ISO 8 - Presentation of periodicals to include electronic periodicals based on the NISO Recommended Practice for the Presentation and Identification of E-Journals (PIE-J).

**Actions:**
TC 46 invites the WG7 to provide the CD text to the TC 46 Secretariat by the next TC 46 plenary meeting and requests the TC 46 Secretariat to submit a CD ballot.
5. Standards under development (2016)

5.1 Under the responsability of TC46

ISO/NP 8
Presentation of periodicals

ISO/DIS 5127
Information and documentation - Vocabulary
ISO/DIS 20614 Data exchange protocol for interoperability and preservation

ISO/AWI 20674-1
Transliteration of scripts in use in Thailand -- Part 1: Transliteration of Akson-Thai-Noi

5.2 Under the responsability of SC4

ISO/DIS 15836-1
Information and documentation -- The Dublin Core metadata element set -- Part 1: Core elements

ISO/DIS 20614
Information and documentation -- Data exchange protocol for interoperability and preservation

ISO/DIS 28500
Information and documentation -- WARC file format

5.3 Under the responsability of SC8

ISO/NP 19580
Information and documentation -- International archives statistics

ISO/NP 21246
Key indicators for museums

ISO/NP 21248
Quality assessment for national libraries

5.4 Under the responsability of SC9

ISO/DIS 2108
Information and documentation -- International standard book number (ISBN)
ISO/DIS 3901
Information and documentation -- International Standard Recording Code (ISRC)

ISO/NP 15707
Information and documentation -- International Standard Musical Work Code (ISWC)

ISO/CD 20247
Information and documentation -- International library item identifier (ILII)
Appendix A: list of published standards (2016)

ISO TC46 – Information and documentation

[ISO Sub-Committees: TC46/SC4 Technical interoperability; TC46/SC8 Quality - Statistics and performance evaluation; TC46/SC9 Identification and description; TC46/SC10 Requirements for document storage and conditions for preservation; TC46/SC11 Archives/records management]
