Challenges

- University missions (French Education Code, Art. L123-2 and L123-3).
- UPN’s open science strategy.
- Active participation in national and international open science networks.

The UPN takes a firm stance in favour of the development of the virtuous ecosystem of open science. The UPN is raising awareness about the need to support open science infrastructures.

Reasons

The economy of open science is fragile. We need to build now for the future.

Method

**SCIENTIFIC CHOICES**

- Scientific and strategic coherence

**CRITERIA AND REQUIREMENTS**

- Inspiration from national and international criteria

**RECTOR’S ENDORSEMENT**

- FNSO, France: Fonds national pour la science ouverte ouvrirlascience.fr
- IOI, International: Invest in Open Infrastructure investinopen.org
- SC OSS, Europe: Application process - SCOSS - The Global Sustainability Coalition for Open Science Services scoss.org

Action

...take part in the governance of selected open science infrastructures and networks

...initiate, design and manage an institutional budget dedicated to supporting strategically selected players and infrastructures.

This strengthens and guarantees...

- a healthy and solid governance...
- ...and... the financial robustness of these open science infrastructures.

Effects

- **Université Paris Nanterre**
- Open science infrastructures
  - Support from the University of Paris Nanterre (UPN)
  - Academic and research libraries
- **THEMES**
  - SSH Social Sciences and Humanities
  - HN Digital Humanities
  - PIDs Persistent identifiers
  - Hal. Institutional Open Access Repository
- **INSTITUTION**
  - Open Science Charter
  - science-ouverte.parisnanterre.fr/strategie-science-ouverte/la-charte
  - Visibility
  - Strong positioning
  - Increased participation in open science networks
  - Consistency with UPN commitments with DORA / CoARA
- **RESEARCHERS**
  - Meeting the infrastructure needs of the university community
  - Integrating open science into research services
  - Strengthening open science skills
  - Development of open science practices
- **LIBRARIES**
  - New skills sets
  - New research support services
  - Forward-looking and innovative services linked to the supported infrastructures and networks
  - Key role for the library in the university’s open science strategy
- **CITIZENS**
  - Access to academic knowledge
  - Possibility to re-use open research results
  - Access to scientific education
  - Engage to participatory science/citizen science projects

2022

- Themes
  - Open science
  - Support from the University of Paris Nanterre

2023

- Themes
  - SSH Social Sciences and Humanities

2024...

- Themes
  - National and international infrastructures
  - SSH and Digital Humanities
  - Infrastructures for promoting research
  - OER Open Educational Resources

2022

- 74 000 €
- 2 librarians
