UVic and IITGN librarians conducted a multi-year study, assessing graduate students’ information needs for workshops and information literacy (IL) programs through surveys and interviews. The poster presents study findings and emphasizes the essential elements of the train-the-trainer program for librarians.

**OBJECTIVES**

The objectives of this study are to:
- assess library usage and analyze the research skills of graduate engineering and science students
- evaluate the need for and impact of library workshops offered; and
- use data to implement an information literacy program at IITGN

**METHODOLOGY**

The study employed a mixed methods approach, combining quantitative and qualitative data collection.
- Surveys were conducted at IITGN (n=500) and UVic (n=500), with 11% (n=55) and 11.6% (n=58), response rates respectively.
- Focus group interviews involved 40 graduate students at IITGN and 21 at UVic.

**LIMITATIONS**

- Meeting over two time zones
- Cultural differences
- International travel fatigue
- Covid-19 pandemic

**PROJECT OUTCOMES**

- Train the Trainer style program (SDG#11)
  - Full-day workshops or half-day workshops tailored to institutional needs
- IL program with different components at IITGN (SDG#12)
- Implementation of asynchronous IL modules at UVic (SDG#4)
- Cross-collaboration and training at IITGN (SDG#4)

**SURVEY RESULTS**

- At IITGN
  - 60% used ejournals and 55% used research databases online
  - 9% consulted a librarian for research needs always, 62% sometimes and 29% never consulted a librarian

- At UVic:
  - 55% used ejournals frequently and 55% used research databases
  - 55% met with the librarian sometimes for research needs while 45% never consulted a librarian
  - At both institutions, there was a high dependency on Google Scholar and electronic resources

**FOCUS GROUP RESULTS**

This research ensures inclusive, quality education by promoting lifelong learning for librarians and library staff in India, as well as enhancing the overall impact of education and knowledge dissemination.
