

# Voices **BEHIND WORDS**

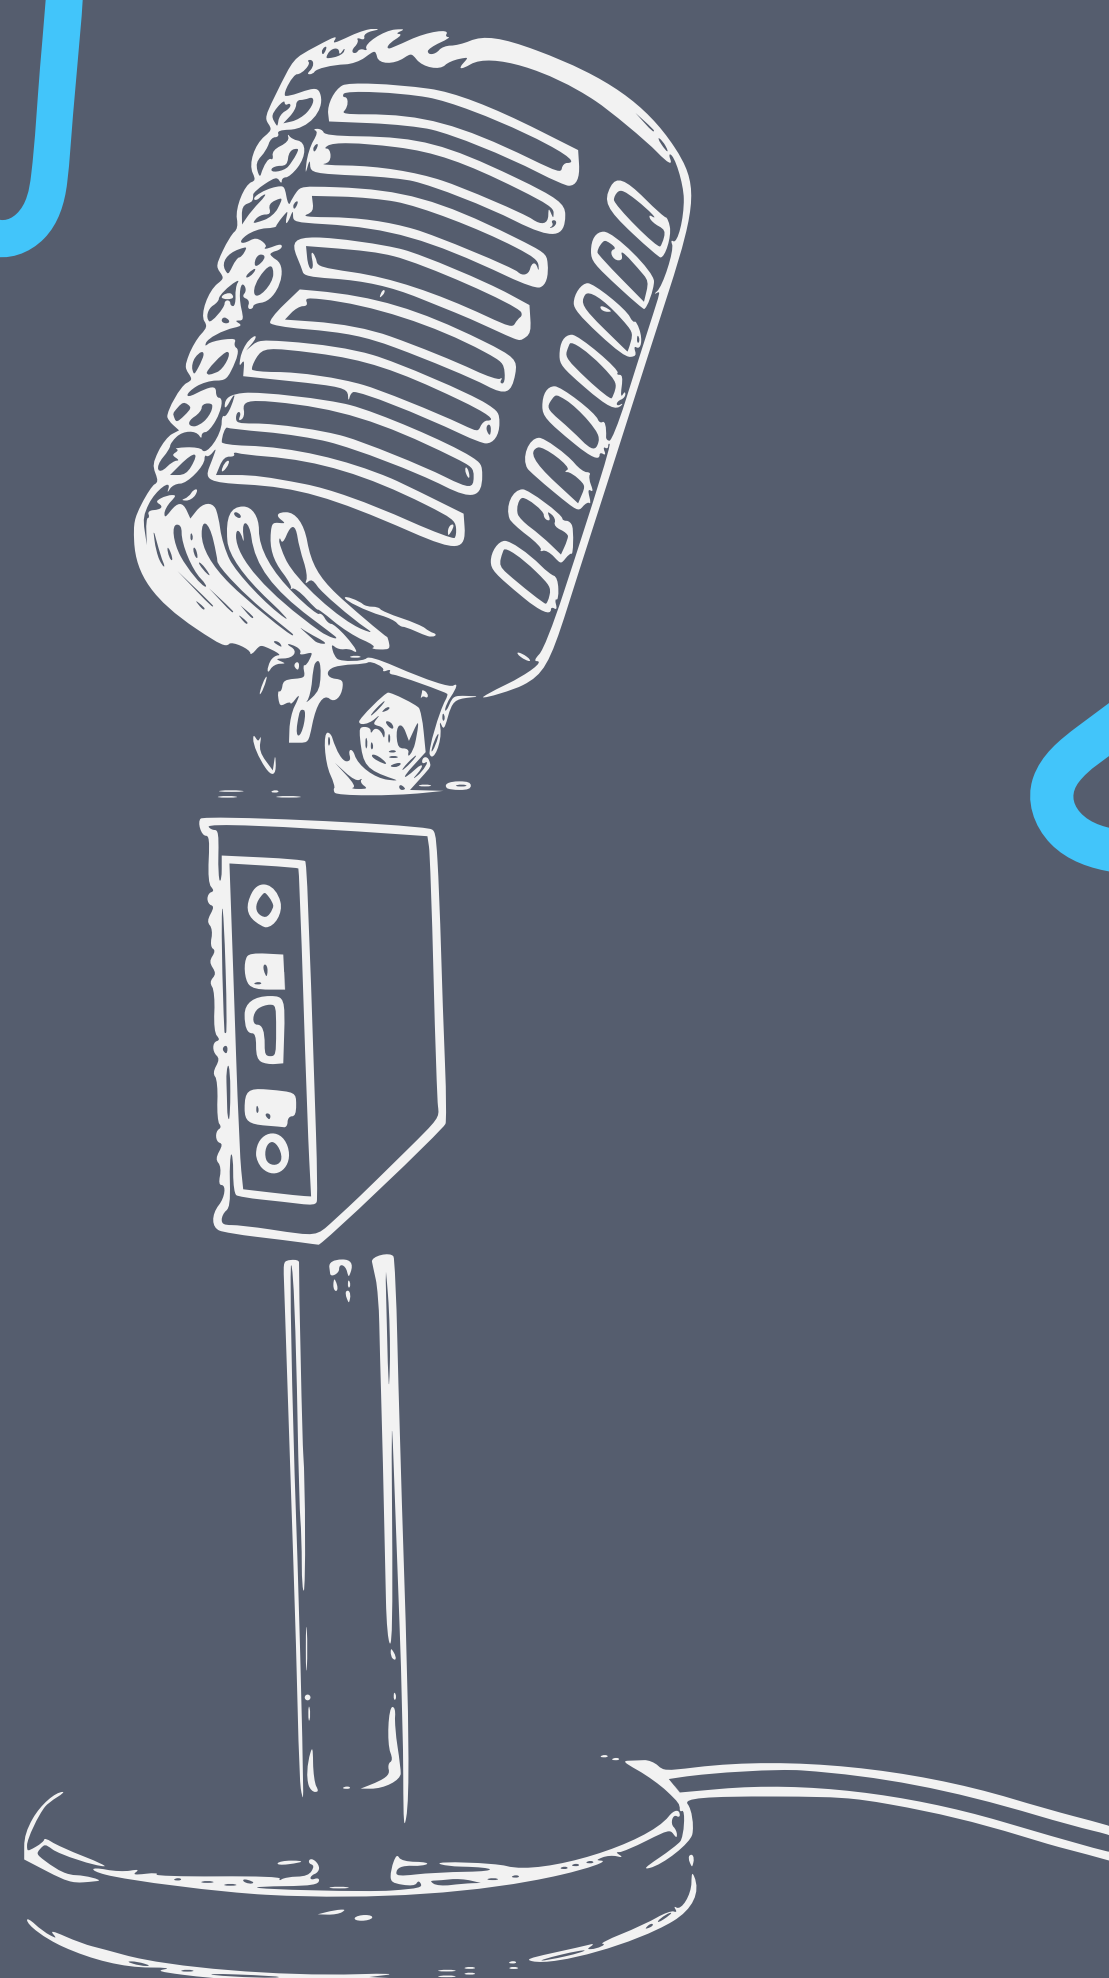

Croatian Library for the Blind  
**PODCAST** since 2018

Our podcast is the gateway where authors can become aware of the readers to whom literature is not easily available.

Each of our members reads around 45 titles per year. Percentage of titles in accessible formats is still very small compared to the mainstream production.

Guests are authors whose books we prepare in accessible formats, many of them have narrated Daisy audio versions of their own works.

## FACTS

One of the topics is always the production of books in accessible format and the necessity of equal access to knowledge, culture and fun for persons with print disabilities.

Authors answer user's questions. Podcast episodes are about opening oneself to another person, connecting authors with their readers and giving a written word access on different levels.

Podcast episodes are available on the library's YouTube channel
